

PEDAL LIFT PL-324

Pedal Lift PL-324 is a **mechanical work platform** that brings compromise between work platforms and scaffolding. Device consists of **steel chassis** as a base of the **aluminium tower** with working platform. Elevating of the platform is being performed by **one person stepping on the pedal mechanism**, where one step elevates platform by 14 cm.

- Working height 9.1m
- Platform capacity 250 kg
- Manual "Low Effort" operation
- No batteries or engine required
- Environmentally friendly
- Platform size 1.85m x 0.61m
- Compact storage dimensions
- Optional road trailer
